

# Achieve more with

# AdvoLogix

## Integrated Accounting

Our integration capability is best in class. In fact, the Salesforce.com AppExchange boasts over 3,000 available applications, 44% of which are free.

Accounting Seed provides complete general ledger, full accrual business accounting on the Force.com platform making it an excellent companion for AdvoLogix.

AdvoLogix and Accounting Seed seamlessly coalesce together within your Salesforce organization to create a “best of breed” solution. There is no need to synchronize across different platforms because all data is centrally managed within the same Force.com ecosystem.

**The integration provides the following functionality off the shelf:**

- Creates Accounting Seed Billings (invoices) from Time & Expense records entered in AdvoLogix.
- Provides a “work-in-progress” analysis for Time & Expenses.
- Manages the link to between an Accounting Seed Project and an AdvoLogix Matter.
- LEDES 1998B export capabilities for Accounting Seed Billings.

**Contact our team to get started with a personalized AdvoLogix experience.**
