Achieve more with

AdvoLogix

Cloud Security Checklist

Your requirements demand modern security standards from a trusted source.
The AdvoLogix App Cloud includes a host of security features ranging from
fine-tuned control over user access to multi-factor login authentication.

Application Security

Govern application and data access control,
password policies, field-level security and more.

Infrastructure Security

Run applications on Salesforce.com's secure global data center,
which includes automatic scalability, backup, and recovery.

Network Security

The platform includes HTTPS, authentication,
access management, and network security controls.
